TASK CPC

Design Features

- 3" x 6" Velcro MOLLE loop section for the front
- 5" x 9" Velcro MOLLE loop section for the back (the top being only 6" wide instead of 9")
- Hypalon strap for mounting PTT, hooking sunglasses, or anything else the wearer would like to use it for.
- Top elastic loop for chem light.
- Top two-way zippered admin pocket that is separate from the plate bag to allow for comms wire routing behind the admin pocket. Pocket is deep enough to fit 3 Glock17 magazines.
- Dual layers vertical straps on sides for PTT, QASM buckles, or G-hooks attachment for placard, chest rigs, or backpacks.
- Two Velcro onewrap loops for cable/hydration tube management
- Capable of accepting both Crye Precision and Eagle Industries front flaps via our custom designed front flap attachment system.
- Capable of accepting Crye Precision zip-on back panels.
- Deployable extended drag handle that is stowed when not in use. Sewn all the way down to the bottom of the rear plate bag for durability and strength.
- Hypalon loops on the sides for removeable KJM quick release tactical vest buckle.
- Capable of accepting skeletal or Velcro-on cummerbunds available from other companies.
- Mesh on the top inside face for ventilation.
- Four detachable vertical comfort pads (pontoon style)
- Plate retention flaps on the bottom are split to contour to the curvature of armor plates.
- Shoulder straps are fully adjustable in height and have sewn lines for cutting it to be shorter.
- Shoulders attach to the front and rear plate bags via G-hooks for a more articulated shoulder.
- Optional quick-release shoulder using KJM quick release tactical vest buckle.
- Shoulder has built-in mounting solution for attaching a pack.
- 3D padded mesh shoulder pads aid in comfort and reducing hot spot on the traps and shoulders. Has comm routing slot on the sides.
- Quick-release 4" wide elastic 3 cells cummerbund using KJM quick release tactical vest buckle.
- First cell is overlapped behind the KJM quick release tactical vest buckle to maximize the real estate behind the KJM buckle.
- First 2 cells are capable of accepting a pistol and a rifle magazine, third cell only accepts rifle mags.
- Every cell has a removeable and invertible U-shaped elastic retention strap that has loops on the ends to accept PRC-152 / MBITR sized radios.
- Outside of the cummerbund is 3 MOLLE rows made of Hypalon. ½" for the top and bottom rows and 1" for the middle row. This allows the cummerbund to accept any MOLLE pouches on the outside of the cummerbund at the appropriate spacing.
- Optional side plate pockets are constructed of 4-way stretch Tweave material and accepts 6" x 6" plates ranging in thickness up to 1" max.
